**Keywords:** Personnel, academic institution, educational technology, community, superstition, political, professional level, management system, decrees and resolutions, educational process, student education.

The National Literature Programme ♪ Implementing the laws on education, improving the quality of education in the educational system, improving the quality of education, promoting and directing the work of the student community today, engaging parents and the community in educational activities, and establishing close cooperation with them are the main tasks assigned. Successfully solving these tasks requires raising the intellectual, political, and professional level of teacher training. Government policy in the field of education involves the formation of a citizen of a perfect person in all respects through a continuous education system that is incompatible with educating a person intellectually and morally and morally. In this way, one of the most fundamental constitutional rights of a citizen is the right to education, to demonstrate artistic abilities, to develop intellectually, and to work in his profession. The Education Act provides for quality education through general secondary and secondary or vocational education standards, as well as the selection of forms and types of educational and vocational training, continuous improvement of skills, the right and broad capabilities to undergo appropriate rehabilitation if necessary.

As a consumer of educational services, a person is guaranteed to receive state education and see professional training. In the process of education, an individual must comply with the requirements set out in the state educational standards. After receiving the appropriate qualifications as the creator of educational services, he works in the field of education, material production, science, culture and service and participates in teaching his knowledge and experience.

Recently, changes have been made to the ministry's leadership, many tasks have been undertaken to improve the quality of education by introducing advanced pedagogical and information and communication technologies into the learning process and improving the position of teachers in society. The meeting presented measures aimed at reforming the public education system developed under these guidelines. The president gave orders to increase the monthly salary of teachers, their position in society, and to support them socially and legally. Various supervisory bodies emphasized the need to restrict inspections of teacher activities, to organize teachers, to attend meetings, not to engage in activities that do not apply to subscriptions and so on.

It was tasked with establishing a special legal service to protect the rights of teachers. In this regard, our president, Sha'drach, Me'shach and A-bed'ne-go, said: "The quality of secondary education needs to be elevated to a new phase. Based on what children need to know in each class, it is necessary to revise state educational standards and curriculum. It is necessary to create and publish textbooks based on the most advanced methodologies, strengthen the fields of technology, engineering sciences, mathematics, art, foreign languages in schools, and re-equip laboratories in this area. It is also important to pay attention to ensuring incompatibility with the systems of preschool education and higher education."

It noted the need to revisit the requirements for principals and deputies of secondary schools, appoint individuals with the ability to manage, and sharpen the responsibility of vice-presidents of spiritual, educational, and educational affairs. Special attention was paid to financing of the public education system. It has been emphasized that it is appropriate to establish a separate fund under the Ministry of Public Education to increase financing in these areas in the formation of state budgets for 2019, as well as to attract highly qualified professionals. Instructions were given to establish a special injuring company in the public education system for the construction, reconstruction and maintenance of schools. It also focused on such issues as the widespread introduction of information and communication technologies in the education system, the elimination of extracurricular income from schools, the establishment of an internal community monitoring system in schools, and the development of a school ranking in order to increase sample schools. The meeting heard reports from unscrupulous leaders on the areas discussed and assigned appropriate assignments. In particular, the following activities will be undertaken to improve the effectiveness of spiritual, educational, and educational activities:

- ✓ implementation of five initiatives, including comprehensive measures aimed at creating additional conditions for the education of young people, including attracting young people to culture and art, physical education and sports, improving the literacy of their use of computer and Internet technology, promoting reading, developing girls' professional skills;
- ✓ Develop and implement the concept of developing the concept of developing the moral and ethical minds of young people aimed at systematically organizing spiritual and educational activities in schools, improving the efficiency of the measures taken in this regard, improving the intellectual well-being, thinking and worldliness of young people, strengthening their ideological immunity, patriotism, and educating them as a perfect generation living with a sense of service to the interests of the people ing.
- ✓ use educational methods that require innovative approaches to this subject, preparing young people with human qualities as professionals, mastering patriotic, entrepreneurial, modern knowledge and skills, capable of taking responsibility for solving the important tasks facing the state and society;
- ✓ Development and implementation of measures to improve sports as a value in educational institutions, promote healthy living among students;
- ✓ perfecting national and ethical values, along with universal values such as awareness of the content of the laws of young people, developing their legal minds and cultures, adhering to a healthy lifestyle, human rights, [gender equality](#), peace and interethnic harmony, freedom of conscience, respect for the languages, traditions and traditions of all nations and nations, socio-political and economic activity, strong citizenship formation of position;

- ✓ create conditions for social adaptation of students with disabilities, promote inclusiveness ideas;
- ✓ systematically organize the cooperation of parents, neighborhoods and higher education institutions in the upbringing of young people;
- ✓ Improving the work of sociological and pedagogical-psychological service groups in schools, preparing students for family life, and strengthening the family;
- ✓ Create concrete frameworks in educational institutions for meaningful leisure activities by encouraging students to learn craftsmanship, acquire new knowledge, work on themselves, use modern technological advances purposefully, and develop entrepreneurial skills;
- ✓ • Effective methods of education, widespread use of modern information and communication technologies, attention to their interest in organizing spiritual and educational events and support their initiatives in order to prevent students from being influenced by various information attacks, bedtime ideas, preventing them from committing socially dangerous acts by them, uniting them for the future of our Country;

Within the framework of the concept "School is a fireplace of spirituality and enlightenment", the emphasis was placed on the development of cooperation of higher educational institutions on the basis of a mentoring model on issues such as the formation of a spiritual and educational outlook for students and young people, the improvement of legal literacy, the promotion of vocational training and the preparation of an independent life.
