Fatkul (2022) that Improving responsibilities and roles as well as Public in maintenance and service unit education education Create atmosphere and conditions transparent , accountable , and democratic in maintenance and service quality education in the unit education . Accommodate and distribute inspiration and initiative Public in give birth to policy operational and educational programs in the

unit education . Sayuti , A. (2022) that Roles and responsibilities answer Public in organizing education in frame autonomy area . Autonomy is develop autonomous Indonesian people , who provide discretion for formation potentials the best that everyone has individual optimally _ role from institution education as center knowledge (central science), science technology and culture Becomes more important and very strategic .

Mukhsin Mukhsin (2019) that Writing a discussion of the results of research on quality improvement strategies in the era of educational autonomy is aligned with the systematics and research questions. In this study, the approaches that need to be considered in improving the quality of education are continuous improvement, setting quality standards, changing culture, changing the organization, and also maintaining relationships with customers. The research is in accordance with the applied research objectives, namely developing the quality of education in the era of regional autonomy and educational autonomy through the application of management principles. This conclusion has answered the benefits or uses of research, namely efforts to manage institutions to improve the quality of education in every region and region throughout the Republic of Indonesia.

Cahyana , A. (2010) that The results of the discussion of research efforts to improve school quality through educational unit autonomy. School programs that are developed jointly between schools, parents and the community are unique and may differ according to their services to meet the needs of the community, so the programs that must be prepared must support the development of the national curriculum by taking into account the steps and who will convey them in the learning process. The research is in accordance with the research objectives, namely the variety of school environmental conditions and the varying needs of students in the learning process. This conclusion has answered the benefits or uses of research, namely the process of improving the quality of education in the concept of school-based quality improvement management.

Rahman. (2016) that According to Muhaimin that Islamic religious education meaning effort how teach and educate regarding the Islamic religion as well as values in order to attitudes and views somebody that ok . According to Harun Nasution that destination Islamic religious education in schools including making _ pious man , that is as pious person _ to Allah SWT inside fulfill all charity his worship with method make self as private owner _ commendable morals . According to al Nahlawi that education Islam aims to make individual nor group to enter to in Islamic religion in a manner whole and make it good seen from individual nor society .

Suharwanto , (2019) that According to Herman (1995), change must be done in the educational process , want no want to must care suitability with customer. Feedback from customer this must Becomes big in determine degrees quality services produced . _

According to Muhammad Fadhil Al- Jamaly that Islamic education namely as effort for instill and grow to participant teach to live Becomes more means with base teachings as well as good value in life _ real . With exists effort it is hoped that this will form more individuals _ good from all side . From various opinions and views about Islamic religious education and directions education Islam in institutions education , then there is a number of similarity in meaning of view the including : There is a development process science and education in a manner continues , exists connection Among two split party that is educators , parents and participants learn and the last

there is planting as well as coaching potential also values religious in mind as well as soul participant educate .

According to (Suprapti, 2014) that Education is a investation period long for every country, go ahead nope a country in the future come can be measured from how much good moderate education going on in a country such, then could said that education is one tool for reach ambition for a Country, too with the State of Indonesia. one possible way taken by the State for give birth to generation that can dependable with method give the best and affordable education for whole element Public

Method

Method activities used that is observation direct , where activity project held with down direct To do observations at SDN No.29 Kota Selatan. In our class did observation and recording direct about activity implemented projects _ as well as response participant educate During activity learning , fine that attitude student for brave Up lead prayer , answered moment given question , as well in activity discussion .

Target implementation activity project is students Elementary School . Activity our project was carried to be exact for students grade 4. We choose 4th grade because class the including class must be high prepare maturation in learning so you can Becomes participant education expected by society school . because that , we carry out activity projects on students 4th grade for hone ability motor , cognitive as well as psychomotor / skills students , for prepare student follow activity learning at school basic .

Results And Discussion

Results

Activity project “ Knowing the Names of Angels Together With The task with using Media Puzzle” on the project this shared into 2 groups , which where group have characteristics alone in answer question . Every participant educate capable disclose what have they see and what already they take a closer look .

The reason we took title project “ Recognizing the Names of Angels Together The task is from Media Puzzle”, because project the in accordance with material we take namely " Education Autonomization " in which the school base must provided with related education about religious . Expected participant educate could increase aspect development physical, cognitive and attitudinal high religious . we take design ideas with provide learning media " recognize What is the name angel along with his job with using jigsaw puzzles. The reason we took design this for educate participant educate so you can knowing What is the name angel along with his job .

Atmosphere class arranged in a manner comfortable and fun . Student could expression with free in match the puzzle accordingly with place that has been provided . During activity projects , we provide ice breaking and implementing discussion direct to participant educate , with interaction direct , have attitude friendly and humorous, giving many attention , as well give present to participant educate for fishing as well as guide student study brave Secrete opinion they so that atmosphere class Becomes active . With thereby student can focus follow activity learning and goals activity could reached .

Discussion

Activity project this will be held on October 17 2022 at 09.00 WITA at SDN 29 Kota Selatan. Activity this started with say regards then next with pray . Next enter the session introductions , we introduce to each other participant learn and get good response _ from them . We also invite they for introduce self . After session introductions , we do ice breaking ie sing song spirit in language arabic order participants educate could more active in class .

Before that's what we checked presence student grade 4. Many students enthusiastic answer present when his name called . Student class 4 amounted to 8 people, students man totaling 6 people and students woman totaling 2 people. After that distribution divided group _ into 2 groups . We are four prepare learning media that is in the form of puzzles. After that's what we show to participant teach , and give question to they that there is how many angels of ALLAH SWT and what just Duty from each angel the . Answer various starts _ popping up , someone answered there are 10 angels of GOD SWT, someone answered that angel jibril that his job convey revelation .

Activity question and answer session done and we deliver present to all participant educate . We end activity with recite hallelujah and continue with session photo together participants educate . Activity our project in grade 4 ended at 10.30 WITA. Before close our activities provide reflection or evaluation to participant educate about activity study day it and participants students are very enthusiastic in disclose her feelings During in activity learning going on .

Activity our project is running with smooth and no there is constraints . At the end our activities provide opportunity to participant educate for give opinion about

activity learning day this . Lots of students enthusiastic in express her feelings . Participant students are very happy and enthusiastic when they get to know the 10 Angels of ALLAH SWT along with with his job . They are very enthusiastic in guess and answer the questions we provide . Participant students are very active inside class and them race for answer and guess What is the name angel

Conclusion

In the era of autonomy , quality Education is largely determined by policy government for participant educate that is with method make creativity learning education at school base , expected participant educate could understand learning education for develop aspect development physical , cognitive , emotional , and social participant educate . because _ it , we take design ideas or create learning media for participant educate in the form of " Know Miscellaneous Angel Along With The task With Media Puzzle".

Participant educate expected could understand aspect learning education for develop aspect development physical , cognitive , emotional , and social participant educate . Participant educate could know and know types angel along with his job . Participant educate expected could have behavior and attitude high religious , too _ showing works and variety activity with use various mediums.

Suggestion

Environment school as the place ongoing activity expected learning _ could give positive motivation _ to development creativity and development participant educate . Inside _ environment school really has enough influence _ big in development children participant educate , that is in knowing Miscellaneous angel along with his job . Factor environment , association and manner they are taught very influential on development participant educate . Much to be expected that participant educate must start develop character and interests in learn, order could reach destination maximum learning . _
